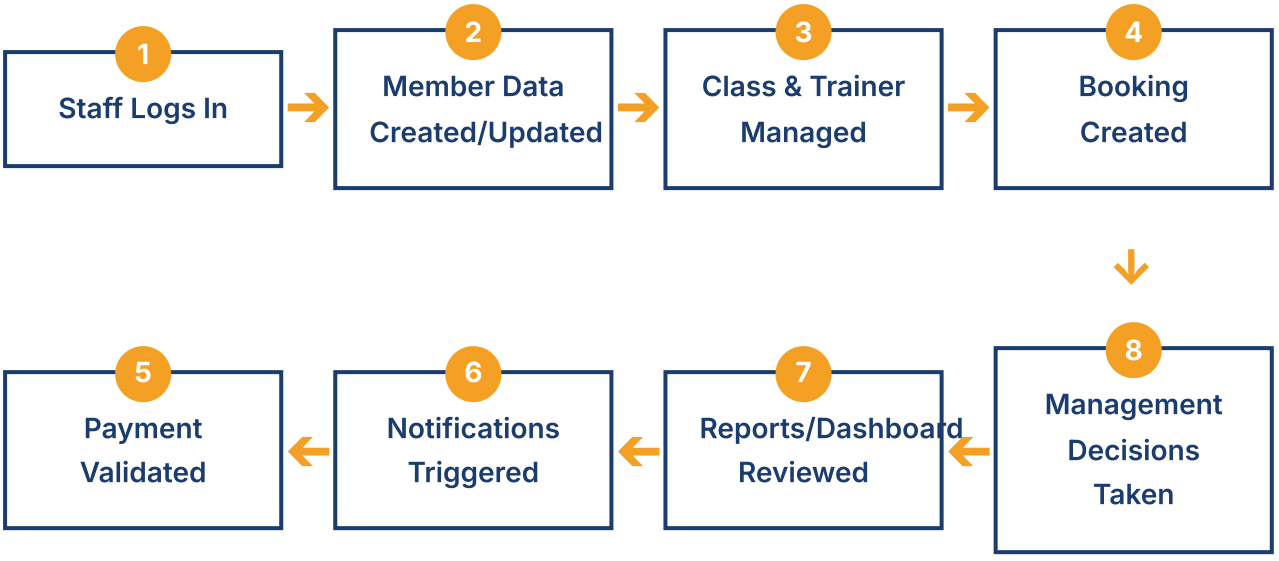
3. Requirement Analysis Phase

3.1 Customer Journey

The operational flow of the FitHub CRM system follows a structured 8-step process to ensure seamless management of members, classes, bookings, and facility operations. The step-by-step journey is illustrated below:



3.2 Functional Requirements

The core system capabilities required to support the business processes are outlined in the table below. Each functional requirement (FR) details a specific feature of the CRM.

FR NO	REQUIREMENT	DESCRIPTION
FR-1	Secure User Login & Access Control	Secure user login and role-based access control for different user types (Admin, Manager, Front Desk, Trainer)
FR-2	Custom Objects	Custom objects: Member, Trainer, Class, Booking with proper relationships and auto-number IDs
FR-3	Membership & Class Management	Comprehensive management of memberships and fitness classes including scheduling and capacity tracking

FR NO	REQUIREMENT	DESCRIPTION
FR-4	Booking with Payment Validation	Class booking system integrated with payment validation - booking confirmed only when payment is marked as Paid
FR-5	Auto-Calculation	Automated calculation of member status (Active/Expired) and booking amounts based on membership type and class type
FR-6	Email Notifications	Email notifications for subscription expiry and general reminders
FR-7	Scheduled Renewal Reminders	Scheduled system for proactive renewal reminders - daily reminders for subscriptions ending in 5 days
FR-8	Reports & Dashboards	Business reports and analytical dashboards for revenue trends, class popularity, membership status, trainer utilization

3.3 Non-Functional Requirements

System attributes concerning operation, performance, and structural qualities are defined to ensure the platform meets quality standards and user expectations.

CATEGORY	REQUIREMENT	DETAILS
USABILITY	Simple layouts and clear navigation	Intuitive UI with minimal training required
SECURITY	Profiles, roles, field/object access control	Granular permission sets per user role
RELIABILITY	Accurate automation and stable cloud storage	99.9% uptime SLA with Salesforce cloud
PERFORMANCE	Fast report/dashboard load times	Target < 3 seconds for all reports/dashboards
AVAILABILITY	24/7 access via Salesforce cloud	Accessible from any device, anywhere, anytime
SCALABILITY	Supports growth in members/classes/branches	Architecture supports 10x growth without redesign

3.4 Technology Stack

The designated architectural components and technologies utilized to construct the CRM are summarized below, mapping each layer to its respective Salesforce functionality.

LAYER	TECHNOLOGY	DETAILS
Platform	Salesforce Lightning	Cloud-based CRM platform with modern Lightning Experience UI
Data Layer	Salesforce Custom Objects	Member, Trainer, Class, Booking objects with relationships
Automation	Formula Fields, Validation Rules, Flow, Apex Triggers, Scheduled Apex	Business logic and workflow automation

LAYER	TECHNOLOGY	DETAILS
Analytics	Reports and Dashboards	Real-time business intelligence and KPI tracking
